TRACKSIDE BENGALURU

NAMMA METRO QUICK GUIDE
PURPLE GREEN YELLOW

FOLLOWING A TRAIN

SHEET, SCROLLED DOWN

ON THE MAP

1. **Clock.** Bengaluru time (IST), the time of day and how many trains are running.
2. **Speed.** Cycle Live, 10×, 30× and 60×. Live matches the real clock and stretches the map to 50× so trains visibly move.
3. **Network.** Zoom out to all three lines. Tap again to follow your train.
4. **Screensaver.** Hides the controls and starts a slow camera tour.
5. **Your train.** Underground, it glows through the ground in its line colour.
6. **Next stop and ETA**, plus where the train is: "Passing ..." or "Underground, beneath ...". Tap to open the sheet.

IN THE SHEET

7. **Season.** Auto follows the date: winter pink trumpet trees, summer jacaranda and gulmohar, monsoon rain.
8. **Map stretch.** Spread stations 1× to 50× apart. Trains and buildings keep their size.

Higher up the sheet: line filter, trains running now and the stop list. Tap any train on the map to follow it. Drag to rotate, pinch or scroll to zoom.

SCREENSAVER IN THE MONSOON

9. **Big clock.** Sky and light follow Bengaluru's sunrise and sunset.
10. **Caption.** Train, where it is and the next stop. The camera switches trains about every 30 s.
11. **Underground train** heading into KSR Railway Station, shown through the ground.
12. **Edge markers** point to nearby places just off-screen, with distance. Tap anywhere to exit.

Times follow a typical week from the unofficial BMRCL GTFS (Vonter), built from BMRCL's published timetables. Stop times are modelled, so expect a minute or two of difference.
